

DAVID ESEOGHENE OJIYOVWI

Senior / Lead Full-Stack Software Engineer

eseoghenedavid1@gmail.com | david.ojiyovwi@eastwindafrica.com.ng | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 6+ years designing and shipping scalable enterprise web and mobile applications, backend APIs, and AI-integrated platforms across Education, Healthcare, E-commerce, Energy, Aviation, and Logistics. Owns the complete software lifecycle — architecture, cloud deployment, DevOps, and technical leadership — currently leading full-stack engineering at Eastwind Tech Base, building systems on Next.js, NestJS, Django, and React Native. Track record of leading engineering teams, mentoring developers, and turning product ideas into production-ready systems for multi-vendor marketplaces, food-tech ecosystems, healthcare platforms, and IoT monitoring tools. Brings an uncommon technical range from an engineering background in offshore Oil & Gas production operations.

CORE TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML5, CSS3

Frontend: React, Next.js, React Native, Expo, Expo Router, Tailwind CSS, ShadCN UI, Redux Toolkit, Zustand, TanStack Query

Backend: NestJS, Django, Node.js, Express.js, REST APIs, Swagger/OpenAPI, JWT Authentication, OAuth, Microservices

Databases: PostgreSQL, MongoDB, Prisma ORM, Mongoose

Cloud & DevOps: Docker, CI/CD, Vercel, DigitalOcean, Render, Cloudflare, Cloudinary

Integrations: Paystack, Google Maps API, Google OAuth, SendGrid, Meta APIs, Google Workspace

Engineering Practice: Software Architecture, System Design, Agile/Scrum, Code Review, Performance Optimization, Debugging, Technical Mentorship

PROFESSIONAL EXPERIENCE

Lead Software Developer | Eastwind Tech Base Limited — 2024 – Present | Hybrid

Progressed from Digitalization Lead into Lead Software Developer, leading architecture and delivery across multiple business units.

- Lead architecture, design, and implementation of scalable software solutions across multiple business units, owning technical decisions end-to-end from discovery to production.
- Design backend systems using NestJS and Django, building REST APIs, microservices, and PostgreSQL/MongoDB database architectures for enterprise-grade reliability.
- Build enterprise web applications with Next.js and cross-platform mobile applications with React Native (Expo).
- Drive AI integrations into core products, embedding intelligent features into existing workflows.
- Own cloud deployment and DevOps pipelines (Docker, CI/CD, DigitalOcean, Vercel, Render), improving release velocity and system reliability.
- Set technical direction and mentor developers through code reviews and architecture guidance, raising team-wide code quality.
- Partner with stakeholders on product strategy, translating business goals into technical roadmaps.
- Lead software security practices and performance optimization initiatives across the stack.
- Led digital transformation initiatives as Digitalization Lead, including enterprise software development and operational process automation.

Senior Full-Stack Developer / Team Lead | Tiva Creatives — 2025 – 2026 | Remote

- Led full-stack and mobile development for a portfolio of production products, including Homefoodly, TheOtherWife..
- Directed a distributed development team, coordinating sprints, code reviews, and delivery across concurrent client and in-house projects.
- Built backend APIs and services powering multi-vendor marketplaces, food-tech ecosystems, and IoT energy monitoring platforms.
- Implemented UI across web and mobile surfaces, translating product requirements into production-ready interfaces.
- Managed end-to-end delivery, from technical scoping through deployment.

Lead Full-Stack Developer | NodeTent — 2023 – 2024

- Provided technical leadership across product architecture and client-facing engineering engagements.
- Designed and built backend APIs and frontend systems for client solutions, prioritizing scalable, maintainable codebases.

- Coordinated development teams, managing technical scope and delivery across multiple concurrent projects.
- Served as primary technical point of contact for client solution architecture and implementation.

KEY PROJECTS

SchoolBooks — Multi-vendor educational marketplace with bookstores, eBooks, AI-assisted discovery, map-based delivery, and integrated payments. *Tech: Next.js, NestJS, MongoDB*

Homefoodly — Food-tech ecosystem spanning multiple brands, including EpeCatch, Royal Eja Osan, Saadu Hub, Seafoodie, and Food Export Academy. *Tech: Next.js, NestJS, MongoDB*

TheOtherWife — Cross-platform mobile application built for consumer use. *Tech: React Native, Expo, NestJS*

VoltSense — IoT energy monitoring platform with smart metering, MQTT connectivity, and analytics dashboards. *Tech: React, Node.js, MQTT*

MedMeet — Healthcare platform supporting patient management, NIN verification, and appointment booking. *Tech: Next.js, NestJS*

PsalmsWings LMS — Enterprise Learning Management System for institutional course delivery. *Tech: Next.js, NestJS*

Complete Market — Marketplace platform with a Django-based backend. *Tech: Django, PostgreSQL*

EDUCATION

Bachelor of Engineering (B.Eng), Petroleum Engineering
University of Benin

PROFESSIONAL TRAINING & CERTIFICATIONS

2020 – 2023: Completed an intensive, self-directed transition from petroleum engineering into software engineering, including:

- Axia Africa — Frontend Development Program
- Coursera — Software Engineering & Full-Stack Development (multiple courses)
- Udemy — Full-Stack Development, including courses by Brad Traversy (Traversy Media): React, Node.js, Next.js, TypeScript, MongoDB, PostgreSQL, REST APIs, Software Architecture

PETROLEUM ENGINEERING EXPERIENCE

Petroleum Engineer | Oil & Gas Production Operations — 2019 – 2020

- Supported offshore production operations, monitoring well and process performance to sustain safe, efficient output.
- Contributed to production optimization and process monitoring initiatives across offshore assets.
- Maintained HSE (Health, Safety & Environment) compliance and supported asset integrity in a live production environment.

Core competencies: Reservoir Engineering, Production Optimization, Well Operations, Process Safety, HSE, Asset Integrity
